How to maximize the affiliate program

Affiliate marketing is definitely an excellent way to make money online, but it's highly competitive too. In order to be successful in affiliate marketing you need to know the market needs, learn how to promote products, what works and what doesn't. **The following are a few tricks on becoming successful in affiliate marketing.**

- **Does your content fit to our content?**
 - Joining our affiliate program only makes sense for both of us, if your content and your target audience fit to our content!
 - Try to understand the market needs and look for products that align correctly with the topic of your site.
- **Use text link or a chart instead of a plain link or banner**
 - Show the link, banner or chart in an embedded context (e.g. in form of an advertorial) on your blog, website or mailing list instead of a plain link or even just a banner.
 - Many affiliate marketers put up the ads only on their sites. There is nothing wrong with this approach but know that there are many other traffic sources that you can tap into and promote the products simultaneously.
 - The more targeted traffic you can send to the sales page the more your chances are of making money.
- **Link to the right landing page**
 - Send potential users to the right landing page instead to a general page.
 - Thus, the landing page should be aligned with the source page (the page you put the content)
 - To link to a specific landing site, just place the appropriate url at the end of your tracking link. E.g:
<http://refer.ccbill.com/cgi-bin/clicks.cgi?CA=946065-0000&PA=2487022&HTML=http://www.wallstreetcourier.com/spro/sp-da-cot-data.htm>
- Promote, promote, promote!
- **Do not spam and respect the policies!**
